LETTER OF TRANSMITTAL

November 1, 1913

DR. EDMUND J. JAMES

President of the University of Illinois

DEAR SIR:

I transmit herewith a report of the registration in the University of Illinois for the biennium ending June 30, 1913, together with statistics concerning the composition of the student body, the degrees conferred, the number of the faculty, and the courses offered during the biennium.

Many of the data presented herewith have been kept by the Registrar's Office for a considerable period of years and have been regularly published in various official documents. Certain of them have been printed in the *Annual Register*; others have appeared in the Proceedings of the Board of Trustees; and others still have been incorporated in the Biennial Report of the President of the University to the Superintendent of Public Instruction and have thus been included in the *Illinois School Reports*. Certain of them are regularly contained, also, in the annual reports made by the University to the Bureau of Education and to the Secretary of Agriculture. They are now for the first time brought together in a single volume for convenient reference.

The report comprises the following parts:

1. Enrollment (ten tables; five figures)
2. Composition of the Student Body (nine tables; eight figures)
3. Degrees Conferred (four tables; six figures)
4. The Faculty (six tables)
5. Courses Offered (four tables)

Each of the five parts contains a brief introductory statement defining its general scope and calling attention to items of special interest.

Pains have been taken to make each table clearly self-explanatory and in particular to have the headings indicate with precision the delimitation of the matter covered in each case.

To facilitate ready reference, summaries have been placed at the beginning of all long tables and series of tables; and both an analytical table of contents and an index have been provided. Wherever possible, the larger facts exhibited in the columns of figures have been presented also in graphical form.

Hearty acknowledgments are due to Mr. Harrison E. Cunningham, Assistant Registrar, to Mr. Ira M. Smith, Chief Clerk in the Registrar's Office, and to Mr. George P. Tuttle, Jr., General Assistant in the Registrar's Office, who among them have either performed or supervised the work of making the various tabulations and who have all contributed valuable suggestions with reference to organization and general form. Mr. Cunningham has assisted me in seeing the volume through the press and has made the index.

Respectfully submitted,

C. M. McCONN

Registrar

Index	127

PART ONE. ENROLLMENT

Part One contains the data which are the primary statistical concern of a registrar's office—the figures in regard to the total enrollment in the University and the enrollment in the several colleges, courses, and classes.

This information is given first in summarized form, by colleges, for each of the two years of the biennium; then in complete detail for each year; and finally in comparative form for the two years, by courses (Business, General Science, Architecture, etc.), and by classes (Seniors, Juniors, etc.).

Enrollment: Grand Total

It will be noted that the grand total for the second year of the biennium is smaller than the corresponding total for the first year. The difference represents approximately the loss in numbers sustained by the discontinuance of the College of Dentistry, which was closed on June 30, 1912, and not reopened during the following year. (Its reopening on October 1, 1913, was decided upon by the Board of Trustees on July 2, 1913.) The enrollment of the College of Dentistry in 1911-12 was 125; the difference between the grand totals for the two years is 113. The total enrollment for all departments exclusive of the College of Dentistry increased from 1911-12 to 1912-13 by 12 students.

Enrollment: Colleges

Altho the totals for the two years, exclusive of the College of Dentistry, are practically the same, there was considerable variation in the enrollment of the various colleges and schools—substantial gains in the College of Science (55 students) and the College of Agriculture (61 students), and small gains in most of the other departments, except the College of Engineering, which showed a loss of 130 students, and the School of Pharmacy, which fell off 22 students.

The details of these gains and losses may be exhibited as follows:

GAIN OR LOSS BY COLLEGES, 1911-12 to 1912-13

COLLEGE OR SCHOOL	GAIN	Loss
Literature and Arts.....	17	...
Science	55	...
Engineering	130
Agriculture	61	...
Music	6	...
Law	4	...
Library	4
Graduate	10	...
Summer Session (net).....	10	...
Medicine	14	...
Dentistry	125
Pharmacy	22
Duplicate registration	9	...
	177	290
		177
<i>Net loss</i>		113

Enrollment: Courses

When we come to compare the enrollment for the two years by courses (Table 5, page 18), several interesting points appear.

In the College of Literature and Arts there was a marked increase in the courses in Business and Household Science—in Business, 33 students; in Household Science, 28 students. On the other hand, the enrollment in the General Course in Literature and Arts fell off from 603 in 1911-12 to 559 in 1912-13—44 students, bringing the net gain for the College down to 17 students.

In the College of Science, however, the largest single gain was in the General Science Course—29 students. This figure was exactly equaled by the combined increase in the courses in Ceramics and Ceramic Engineering—15 students and 14 students respectively; total, 29. The courses in Chemistry and Chemical Engineering gained 8 students over the preceding year. The Household Science Course in this College had exactly the same enrollment for the two years. The Course Preparatory to Medicine showed a decrease the second year of 11 students.

The totals for the two colleges of Literature and Arts and Science, which by action of the Board of Trustees on July 5, 1912, constitute now the single College of Liberal Arts and Sciences, show an increase of 72 students, which is 5.5 per cent.

It will be noted that while the enrollment in the College of Engineering as a whole fell off, the course in Architecture gained approximately 5 per cent (to be exact, 5.7), and the courses in Architectural Engineering and Mining Engineering registered small increases—2 students and 3 students respectively.

The additional 61 students enrolled the second year in the College of Agriculture represent an increase of 7.4 per cent.

Of the three courses offered in Household Science, the one in the College of Agriculture lost 4 students and the one in the College of Science enrolled the same number both years, while the one in the College of Literature and Arts gained 28 students. The net gain in Household Science courses was 24 students, which is 10.3 per cent.

Enrollment: Men and Women

The relative number of men and women students remained practically unchanged. Of the total enrollment for 1911-12, 19.3 per cent were women; for 1912-13, 20.1 per cent. The statement which has appeared for many years in the Annual Register, that beginning with the year 1870-71, when women were first admitted to the University, they "have constituted from one-sixth to one-fifth of the total number of students," remains substantially correct.

The gain in the number of women students enrolled the second year of the biennium was 22. As noted above, there was an increase of 24 students in the Household Science Courses; the total number of women enrolled in courses other than those in Household Science actually fell off, therefore, by 2. The General Course in Literature and Arts lost 8

women as well as 36 men. In the General Science Course there was a gain of 4 women as well as of 25 men.

The following figures extracted from Table 5 (page 18) show the enrollment of women in vocational courses other than the courses in Household Science and courses in preparation for teaching (which by our organization are included under the general courses in Liberal Arts and Sciences).

ENROLLMENT OF WOMEN IN VOCATIONAL COURSES (OTHER THAN HOUSEHOLD SCIENCE AND EDUCATION)

	1911-12	1912-13
Business	3	5
Chemistry	0	1
Architecture	2	1
General Agriculture	8	13
Library	39	34
Medicine	37	35
Dentistry	5	—
Pharmacy	4	3
	98	92

If allowance be made for the 5 women enrolled in the College of Dentistry in 1911-12, for whom we have no corresponding figures in 1912-13 on account of the closing of that College, these two totals are almost identical—93, for 1911-12; 92, for 1912-13.

"Percentage of Loss"

Tables 7 and 8 attempt to indicate the extent to which the undergraduate student body consisted of the same individuals during the two years of the biennium and to what extent it was a changing body.

It will be seen (Table 8, page 22) that of the number of undergraduate students (including law students) enrolled in 1911-12, 14.4 per cent were graduated in June, 1912, and 56.2 per cent were continuing their studies on November 30, 1912. This leaves 29.4 per cent who are unaccounted for. They were not graduated; they did not return. For one reason or another they "dropped out."

The complementary figures for the student body of the fall of 1912-13 are shown in Table 7 (page 21): former students, 58.2 per cent; new students, 41.8 per cent.

The interest in this matter centers, of course, in the group of students who failed to return—the "percentage of loss," as it is sometimes called. It will be noted that this varied considerably in the several colleges. It is perhaps natural that it should be highest in the School of Music—40.2 per cent. The College of Engineering is next—33.7 per cent; with the College of Agriculture a close third—32.5 per cent. Then come, at considerable intervals, Literature and Arts, with 26.9 per cent, and Science, with 18.6 per cent; while the College of Law has the notably low loss of 9.9 per cent.

Growth of the University, 1868-1913

Finally come two tables (Nos. 9 and 10, pages 24 and 26) which summarize the increase in the number of students in the University from its opening in the spring of 1868 through the year 1912-13—forty-six years.

For its short spring term in 1868 the Illinois Industrial University enrolled 77 men. The total for the first full school year, 1868-69, was 128. This number increased rapidly till it reached in 1873-74 a grand total of 406. Women students, first admitted in 1870-71, numbered 24 in that year, 53 in 1871-72, 74 in 1872-73, and 90 in 1873-74.

The next year, 1874-75, the total dropped back to 373; from which it worked up again rather slowly to 434 in 1879-80. In this year the number of women for the first time exceeded 100, reaching the total of 112, which was not equaled again for fifteen years—until 1894-95.

In 1880-81, the enrollment again decreased, to 379, and it was a full decade—in 1889-90—before it again reached (and passed) the figure for 1879-80.

In 1890-91, the 500 mark was passed. In the next two decades the enrollment increased approximately 900 per cent—from 519 in 1890-91 to 5217 in 1910-11. A part of this gain in numbers was due to the organization or annexation of new departments—in 1894, the Summer Session; in 1896, the School of Pharmacy; in 1897, no less than four new colleges and schools: the School of Music, the Library School, the College of Law, and the College of Medicine; in 1900, the Courses in Business Administration; and in 1901, the College of Dentistry; but the major part of it was the result of the growth in the four undergraduate colleges at Urbana. In 1910-11, of the total enrollment of 5217, 3196 were registered in the four undergraduate colleges, which were differentiated as far back as 1870; all the departments added or differentiated at a later date, including the School of Music, the College of Law, the Library School, the Graduate School, the Summer Session, the Academy, and the Chicago departments, numbering 2021.

The highest grand total so far recorded was reached in 1910-11—5217 students. In June, 1911, the Academy was discontinued. This department then numbered 304 students, and this loss in the count brought the total for 1911-12 down to 5200, altho there was a gain in that year of 287 collegiate students. As explained above, the still lower figure for 1912-13 represents substantially the loss in numbers sustained by the closing for the year of the College of Dentistry.

The details of the growth of the University by colleges and schools from 1889-90 to date may be seen in Table 10 (page 26) or more casually in Figure 5 (page 32).

FIGURE 5
ENROLLMENT BY COLLEGES, 1893-1913

PART TWO. THE COMPOSITION OF THE STUDENT BODY

Part Two presents data relating to the composition of the student body, derived from the answers given by the students themselves to questions printed on the registration blanks; it indicates, broadly at least, the sources of our constituency—the territories, geographical, scholastic, economic, and religious, from which our students are drawn.

Geographical Distribution

Tables 11 and 12 (pages 41 and 48) show first of all that, roughly speaking, four thousand out of our five thousand students come from the State of Illinois (3936 out of 5200 in 1911-12; 3817 out of 5087 in 1912-13).

Only one county in the State—Calhoun (in the southwest above St. Louis, the county containing no railroad)—failed of representation in the University during the biennium. Three counties in the extreme south—Hamilton, Hardin, and Pope—were represented in only one of the two years.

Cook County, of course, sent a larger number of students than any other one division of the State—approximately a thousand students each year (1047 in 1911-12; 966 in 1912-13).

Champaign County followed with 689 in 1911-12 and 613 in 1912-13. It should be noted, however, that the numbers for Champaign County are swelled by students whose parents have moved to this county temporarily from other parts of the State for the purpose of enabling their children to live at home while attending the University.

Eighteen counties besides Cook and Champaign sent 40 or more than 40 students to the University in one or the other year or both years of the biennium:

COUNTIES SENDING FORTY OR MORE STUDENTS

	1911-12	1912-13
Adams	38	46
Bureau	31	44
Edgar	43	35
Fulton	35	57
Iroquois	46	42
Kane	106	105
LaSalle	81	87
McLean	56	56
Madison	40	36
Peoria	72	65
Rock Island	42	42
St. Clair	41	39
Sangamon	70	70
Tazewell	42	37
Vermilion	61	74
Whiteside	36	42
Will	64	41
Winnebago	35	44

Exactly one-half the counties (51) sent 20 or more students to the University, and approximately four-fifths of the counties (79) sent 10 or more students, in one or the other year or both years.

The number of students from Illinois outside of the counties of Cook and Champaign was, in 1911-12, 2200; in 1912-13, 2238. The following tables show the distribution of these students north and south and east and west in the State.

GEOGRAPHICAL DISTRIBUTION IN ILLINOIS, NORTH AND SOUTH

	1911-12	1912-13
Students from counties (other than Cook and Champaign) lying		
north of a line drawn east and west through Springfield.....	1416	1430
Students from counties which would be cut by such a line.....	254	232
Students from counties lying south of such a line.....	530	576

GEOGRAPHICAL DISTRIBUTION IN ILLINOIS, EAST AND WEST

	1911-12	1912-13
Students from counties (other than Cook and Champaign) lying		
east of a line drawn north and south through Bloomington.....	846	789
Students from counties which would be cut by such a line.....	382	425
Students from counties lying west of such a line.....	972	1024

States other than Illinois sent us approximately 1100 students in each of the years in question (1112 in 1911-12; 1110 in 1912-13). All the states except Delaware and Maine were represented in 1911-12, and all except Delaware and North Carolina in 1912-13. The adjoining commonwealths of Indiana, Iowa, Missouri, and Wisconsin naturally contributed the largest numbers.

From the Insular Possessions of the United States we drew 14 students in 1911-12 and 17 in 1912-13.

From foreign lands we had in 1911-12, 138 students; in 1912-13, 143. Thirty-six countries were represented in one or the other year or both years.

Five foreign countries had 10 or more students in residence in one year or both years:

	1911-12	1912-13
China	50	46
Japan	19	16
Mexico	13	11
Canada	10	13
India	5	10

Schools from Which Intrants Were Received

In studying the composition of the student body the question which arises next after that of geographical distribution naturally relates to the schools from which the students have come. Tables 13 and 14 (pages 56 and 63) answer this question with reference to the new students received as undergraduates in regular standing during the biennium. The phrase "in regular standing" is here used to indicate both "matriculated" students—those who have satisfied the entrance requirements in full, including all prescribed subjects—and "conditioned freshmen"—students admitted with deficiencies of not to exceed two units to be removed within their first year of residence. It excludes "special students"—those admitted, without having satisfied the regular entrance requirements, on the ground of maturity and special preparation in particular subjects which they are permitted to pursue.

The large facts in this matter may be seen at a glance in the three-line summaries at the beginning of the two tables (at the top of pages 56 and 63). More briefly still: the total number of intrants as undergraduates in regular standing during the two years was 2543; of whom 1885 came from public high schools, 231 from other secondary schools, 63 from normal schools, and 364 from other colleges and universities; 1822 came from Illinois schools, 721 from the schools of other states or foreign countries.

A complete list of the accredited public high schools of Illinois is included in each table, so that the schools which sent no new students in either year are shown as well as those that did send new students.

Thirty-five Illinois high schools sent 10 or more new students to the University during the biennium: Urbana, 87; Champaign, 81; Lane (Chicago), 42; Crane (Chicago), 41; Springfield, 31; Oak Park and River Forest Township (Oak Park), 29; Hyde Park (Chicago) and Rockford, each 26; Joliet Township, 25; Englewood (Chicago), 23; Elgin, 20; Decatur, 19; Moline and Quincy, each 18; Danville and Freeport, each 17; LaSalle-Peru Township (LaSalle), 16; Lyons Township (LaGrange) and Wendell Phillips (Chicago), each 15; Canton, 14; East Aurora and Mattoon, each 13; Clinton and Lake View (Chicago), each 12; Alton, Austin (Chicago), Bowen (Chicago), East St. Louis, Lake (Chicago), Sterling Township, and Thornton Township (Harvey), each 11; and Bloomington, Calumet (Chicago), Paris, and Streator Township, each 10.

A general summary of the representation of the Illinois high schools follows:

NEW INTRANTS IN REGULAR STANDING FROM ILLINOIS HIGH SCHOOLS

	1911-12	1912-13
High schools not represented	96	83
High schools which sent 1 student.....	66	56
High schools which sent 2-4 students.....	92	106
High schools which sent 5-9 students.....	27	27
High schools which sent 10 or more students (in one year).....	10	18
<i>Total, accredited high schools.....</i>	<i>291</i>	<i>290</i>

The representation of other Illinois schools may be summarized as follows:

NEW INTRANTS AS UNDERGRADUATES IN REGULAR STANDING FROM OTHER ILLINOIS SCHOOLS

	SCHOOLS REPRESENTED		STUDENTS	
	1911-12	1912-13	1911-12	1912-13

Percentage of Degrees

Tables 15 and 16 (pages 71 and 74) show the percentage of the degrees which were held by students registered during the two years. The important part of each of these tables is, of course, that which shows the percentage of degrees held by the students registered in the Graduate School. This part of these tables is virtually a continuation for the Graduate School of Tables 13 and 14, "Schools from which Intrants (Undergraduates in Regular Standing) Were Received".

The part of these tables relating to the Graduate School may be summarized, to show the representation of the several classes of institutions, as follows. (Where a student holds two degrees, both are counted in the columns headed "No. of Degrees"; hence the totals of these columns are considerably larger than the number of graduate students. Seventy-one out of 329 graduate students in 1911-12, and 105 out of 339 students in 1912-13, held more than one degree.)

REPRESENTATION OF DIFFERENT CLASSES OF INSTITUTIONS

	NO. OF INSTITUTIONS REPRESENTED		NO. OF DEGREES	
	1911-12	1912-13	1911-12	1912-13

Bachelor of Library Science	2	2
Bachelor of Laws	0	2
Master of Arts	41	59
Master of Philosophy	0	1
Master of Science	13	29
Doctor of Law (J.D.)	1	1
Architectural Engineer	1	1
Civil Engineer	1	2
Electrical Engineer	1	2
Mechanical Engineer	3	4
Doctor of Philosophy	1	1
*Graduate of a higher institution which gives no degree	2	2
†Graduate in Pharmacy	1	0
<i>Totals</i>	<hr/> 400	<hr/> 444

The third page of each of these tables (pages 73 and 76) shows the parentage of degrees held by students in (1) the undergraduate and professional departments at Urbana and (2) the College of Medicine (Chicago).

In 1911-12, out of 3654 students enrolled as undergraduates or in Law or Library Science at Urbana, 43 already held degrees; 4 of these students already held two degrees. Sixteen institutions besides the University of Illinois were represented.

In the second year of the biennium, the corresponding enrollment total was 3663, and this figure included 74 students who held degrees, 9 of whom held two degrees. The representation of institutions other than the University of Illinois was 29.

Of 537 students enrolled in the College of Medicine in 1911-12, 33 were college graduates, and 3 held two degrees. Twenty-six institutions were represented.

In 1912-13 the College of Medicine enrolled 551 students. Of these 24 were college graduates, and 3 held two degrees. The institutions represented numbered 20.

Occupations of Parents and Guardians

Table 17 (page 78) summarizes the statements made by the students in the undergraduate and professional colleges and schools at Urbana in 1912-13 in answer to the following query printed on the registration

*The institutions represented in these four cases are Concordia College, the United States Naval Academy, Tangshan College, and the Tokyo Higher Technical School.

†The Graduate in Pharmacy held also the degree of Bachelor of Science.

blanks: "Occupation of parent or guardian?" It serves to indicate, broadly at least, the extent to which each of the economic classes in the community contributes to our student body.

It will be noted that this table and the two tables which follow (dealing with "Religious Affiliations" and the "Ages of Students") cover only the second year of the biennium. It was felt that there was no particular point in making up data of this sort for every successive year. If such statistics be made available for every third year, for example, any significant variations will probably appear with sufficient clearness.

Considerable difficulty was experienced in making a satisfactory classification of the varied occupations, and the grouping here given is undoubtedly open to question at several points. All that is claimed for it is that it seemed on the whole distinctly better than a number of other classifications which were tried.

A further weakness in this tabulation arises from the indefiniteness of many students' replies relative in this matter. Eighty-five students, for example, described their fathers as "manufacturers", without further specification; 233 wrote merely "merchant"; 13, "manager"; and so on.

With all these defects, however, this table exhibits unmistakably the highly democratic character of our undergraduate population. Seventy-six students are sons or daughters of bankers, but 92 are the children of unskilled laborers, and 244 are from the families of skilled laborers (barbers, blacksmiths, carpenters, miners, tailors, tinniers, etc.). The representation from what have been called the "artistic professions" (architecture, art, literature, music) happens to be exactly the same as that from the grocery business—41 students in each case; while the total for "mercantile business", which is really comparable with the total for the "artistic professions", is 680. Or take the business of railroading: we have several high officials represented—one president, one chief engineer, one division engineer; we have also 90 young men and women whose fathers are conductors, locomotive engineers, and station agents, or belong to similar divisions of the service.

Five more or less distinct occupational groups sent us 200 students or more in 1912-13:

Agriculture	909
"Mercantile business"	680
The professions	449
"Financial and semi-legal business" (bankers, brokers, real estate dealers, etc.)	251
Skilled Labor	244

Religious Affiliations

Table 18 (page 85) briefly summarizes the answers given by the students in the undergraduate and professional colleges and schools at Urbana in 1912-13 to the question on the registration blanks as to their religious affiliations.

It is to be noted that the students are in no sense required to answer this question. The Registrar's clerks see to it that all the other blanks

are filled, but take no notice of omissions on this point. This accounts for the considerable number of students (410) from whom we had no expression as to their affiliation or lack of affiliation.

The number of shades of religious belief represented is 41.

The student body is apparently overwhelmingly "orthodox". One student described himself as an agnostic; 3 are liberalists; 2 wrote "undenominational"; and 117 stated explicitly that they had no religious affiliations. There are 64 Unitarians and 38 Universalists. There are, also, 1 Confucianist, 6 followers of Hinduism, and 47 Jews. With all these deductions—made for widely varying reasons as they are,—we have 3001 students, out of 3253 who answered on this point, who belong to what are commonly known as "orthodox" denominations of the Christian faith.

Eight denominations were represented, in 1912-13, by more than one hundred students:

Methodist	907
Presbyterian	617
Congregationalist	264
Christian	239
Baptist	228
Roman Catholic	214
Episcopalian	195
Lutheran	105

Ages of Students

The last table in Part II (No. 19, page 86) relates to the ages of the students in the departments at Urbana for 1912-13, taken as of September 1, 1912. First are shown the average ages, by colleges and schools, by classes, and by sexes; second, the distribution of ages, by classes and sexes.

The average age of all the students registered at Urbana during 1912-13, taken as of September 1, 1912, was 22.02 years.

Both in the institution as a whole and in the undergraduate colleges, the average age of the women students was higher by nearly one year than the average age of the men:

Entire University—average age, men, 21.84; women, 22.70.
Undergraduates—average age, men, 21.20; women, 22.18.

The reverse is true, however, for the Graduate School, in which the men averaged 28.00 years, and the women 27.48 years.

It is natural, perhaps, that the averages for the students in the College of Literature and Arts should run somewhat lower than the averages for the other undergraduate colleges. The lowest average shown is that for the freshmen men in the College of Literature and Arts—18.66 years. Next comes the College of Engineering, with 21.31 years; third, the College of Science, with 21.53 years; fourth, the College of Agriculture, with 21.93 years; fifth and sixth, but almost together, the School of Music and the College of Law, with 22.42 years and 22.49 years respectively; and seventh, the Graduate School, with 27.90 years; while the Library School has the highest average age, 28.05 years.

The latter part of the table shows the distribution of ages—counted as insurance companies do by the nearest birthday.

We had, in 1912-13, 18 students of sixteen years of age—the lowest age at which candidates may be admitted, and one student fifty years of age.

The distribution between these extremes may be summarized as follows:

No. of students in their teens	1119
No. of students in their twenties	2449
No. of students in their thirties	84
No. of students in their forties	10
No. of students 50 years of age.....	1

FIGURE 13
AGES OF STUDENTS, 1912-13

ERRATUM

In the sixth and seventh lines of the third paragraph on page 91, read:
2 master's degrees, A.M. and M.S.; 5 professional second degrees in engineering,
M.Arch., A.E., C.E., E.E., and M.E.

PART THREE. DEGREES

Part Three shows the number and kinds of degrees conferred during the biennium and the geographical distribution of the recipients of these degrees.

Degrees Conferred, 1912, 1913

Tables 20 and 21 (pages 93 and 94) are summaries of the degrees given at the Forty-first Annual Commencement, June 12, 1912, and the Forty-second Annual Commencement, June 11, 1913.

The University at the present time offers courses leading to 18 different degrees: 3 baccalaureate degrees, strictly so-called, A.B., B.S. (in liberal arts, in engineering, and in agriculture), and B.Mus.; 2 degrees in law, LL.B. and J.D.; the degree in library science, B.L.S.; 4 degrees in medicine, dentistry, and pharmacy, M.D., D.D.S., Ph.G., and Ph.C.; and 8 graduate degrees—3 master's degrees, A.M., M.S., and M.Arch.; 4 professional second degrees in engineering, A.E., C.E., E.E., and M.E.; and the doctorate, Ph.D. All of these degrees were conferred during the biennium except the M.Arch. and the A.E.

The College of Dentistry having been closed June 30, 1912, and not reopened until October, 1913, no degrees in dentistry were given in 1913.

From 1876 to 1895 the degree of Bachelor of Literature (B.L.) was regularly given to students who completed a course in liberal arts which did not include Greek. In 1913 it was conferred again, for the first time since 1895, upon a student of the class of 1885 who completed the last required course a few days after the commencement of her senior year and had never actually taken her degree.

Besides the degrees in course, the degree of Doctor of Laws, *honoris causa*, was conferred in 1912 upon Dr. Thomas Jonathan Burrill, Emeritus Professor of Botany and late Vice-President of the University, and Dr. Samuel Walker Shattuck, Emeritus Professor of Mathematics and late Comptroller.

The graduating class of 1913 was smaller by 16 students than the class of 1912. This falling off was due to the dropping out of the College of Dentistry, which had 36 graduates in 1912, and to the smaller number of degrees in medicine—130 in 1913 as against 145 in 1912. There was an increase of 38 in the number of graduates in the colleges and schools at Urbana—5.9 per cent.

Looking at individual departments, we find that the largest increase was in the College of Agriculture, which graduated 27 more students in 1913 than in 1912—a jump of 39.7 per cent. The next largest gain was in the number of master's degrees; the number conferred in 1913 was larger by 22 than the number in 1912. The percentage in this case is 25.8. In

percentage increase, however, no other department can compare with the School of Music, which had 7 graduates in 1913 against 2 in 1912—a gain of 250 per cent! The only large falling off at Urbana was in the College of Engineering, which recommended 16 fewer students for its degree in the second year of the biennium than in the first year—a loss of 8.2 per cent. The number of A.B. degrees conferred in 1913 was less by 5 than the number for 1912. The number of doctorates was exactly the same for the two years (20); likewise the number of degrees in law (26); and there was a variation of one only in the number of pharmaceutical degrees—37 in 1912, 36 in 1913.

Geographical Distribution of Degrees

Of the degrees granted by the University in the departments at Urbana during the biennium, 1005 were conferred upon citizens of Illinois (see tables 22 and 23, pages 95 and 100).

Eighty-nine out of the 102 counties of the State—all but 13 counties—were represented *by graduates* during the two years; 73 counties were represented in 1912, 78 in 1913, 62 in both years.

The following counties—23 in number—had 10 or more citizens in the graduating classes of the two years:

Adams	II	McDonough	12
Champaign	209	McHenry	10
Christian	10	McLean	22
Cook	199	Macon	10
Edgar	II	Madison	11
Hancock	10	Peoria	19
Iroquois	16	St. Clair	14
Kane	29	Sangamon	19
Knox	10	Tazewell	14
LaSalle	22	Vermilion	23
Lee	II	Whiteside	12
Livingston	II		

Twenty-eight states other than Illinois were represented in the graduating class of each of the two years under consideration—in most cases by only one, two, or three students. Twenty states were represented in both years, while in each class there were students from 8 states not represented in the other class; the total number of states other than Illinois represented during the biennium was therefore 36. Indiana had, in both years, nearly twice as many recipients of degrees as any other one state besides Illinois—23 graduates in each year. In 1912, Iowa, with 13, was the only other state to have as many as 10 graduates. In 1913, Iowa had 14, Wisconsin 12, and Missouri and Ohio each 10.

Four students from the Insular Possessions of the United States received degrees during the biennium—2 Filipinos and 2 Porto Ricans.

The two graduating classes contained 50 foreign students, nearly half of them (21) from China—chiefly, of course, students sent to America by the Chinese government out of the Indemnity fund. The remaining 29 foreign graduates were distributed as follows: from Japan, 10; from Canada, 5; from India and Mexico, 3 each; from Cuba and Norway, 2 each; from Argentina, Italy, South Africa, and Uruguay, 1 each.

PART FOUR. THE FACULTY

Part Four contains summaries of the membership of the University faculty for the two years of the biennium. There is added a table showing the total number in the faculty for each year of the University's history, 1868-1913.

Number in the Faculty, 1911-12, 1912-13

Tables 25 and 26 (pages 110-111) show the number in the faculty for each year, distributed by colleges and schools, by ranks, and by sexes.

In tables 27 and 28 (pages 112-113 and 114-115), the same figures are further analyzed, for the undergraduate colleges at Urbana, by departments.

It should perhaps be noted that no undergraduate student assistants are counted in these tabulations.

The total membership of the faculty in the second year of the biennium (587) was larger than the total membership for the first year (583) by only 4 persons.

The smallness of this difference results from the dropping out for the second year of the College of Dentistry, which had in 1911-12 a faculty of 21; and from a decrease in the size of the faculty of the College of Medicine, which numbered but 133 in 1912-13 as against 144 in 1911-12. The faculty of the School of Pharmacy remained the same for the two years (8).

The number of teachers in the departments at Urbana increased from 410 in 1911-12 to 446 in 1912-13—8.7 per cent.

The greater part of this increase is found, naturally, in those colleges which experienced the largest growth in number of students during the same period, namely, the College of Agriculture, which added 17 teachers for 1912-13, and the College of Science, which added 10 teachers. (For the parallel figures concerning the increase in the number of students by colleges, see Part One, page 7.)

The College of Literature and Arts had 1 more teacher in the second year of the biennium than in the first year; the College of Engineering 3 more teachers; the Library School 4 more (3 of them, however, special lecturers, giving only a limited amount of instruction); and the department of physical training 2 more. No increases were made in the staff of the School of Music or in the department of military science; and the College of Law had only 7 teachers in 1912-13 as against 8 in 1911-12.

Further comparisons, by departments, may be made from Tables 27 and 28 (pages 112-113 and 114-115). It will be seen that the variations from the one year to the other are in the main small. The following departments had an increase of 3 or more in their staffs for the second year:

	1911-12	1912-13
English .	28	31
Botany	12	15
Chemistry	43	49
Zoology	13	16
Animal husbandry .	10	18
Horticulture	9	14

Using the figures for 1912-13, the thirty-eight departments comprised in the four undergraduate colleges at Urbana may be summarized according to size of staff as follows:

No. of departments with 1- 5 teachers	15
No. of departments with 6-10 teachers	8
No. of departments with 11-15 teachers	8
No. of departments with more than 15 teachers	7
	—
	38

The seven departments which, in 1912-13, had more than 15 teachers were: chemistry, 49; English, 31; mathematics and mechanical engineering, each 21; animal husbandry, 18; zoology and agronomy, each 16. The eight departments which, in the same year, had from 11 to 15 teachers were: botany, 15; horticulture, 14; physics, 13; Germanic languages and architecture, each 12; economics, dairy husbandry, and household science, each 11. The departments of history, civil engineering, electrical engineering, and theoretical and applied mechanics numbered 10 each in their staffs (1912-13).

The distribution of the membership of the faculty by ranks may be summarized as follows, using the figures for 1912-13 (from Table 26, pages 110-111).

DISTRIBUTION OF FACULTY BY RANKS, 1912-13

	DEPARTMENTS AT URBANA	DEPARTMENTS IN CHICAGO	ALL DEPARTMENTS
Professors	71	42	113
Associate professors	10	11	21
Assistant professors	60	20	80
Associates	39	—	39
Instructors	119	58	177
Assistants	105	9	114
Graduate assistants	25	—	25
Special lecturers	17	1	18
	—	—	—
<i>Totals</i>	446	141	587

From the foregoing table it appears that 15.9 per cent of the teaching staff at Urbana held (in 1912-13) the rank of professor; 13.4 per cent that of assistant professor; 26.6 per cent, instructor; 23.5 per cent, assistant; 20.4 per cent, other ranks.

The first four ranks, professor, associate professor, assistant professor, and associate, which are commonly thought of as constituting the permanent faculty (although associates are appointed for two years only, and most assistant professors for limited terms of two, three, or five years), numbered, in the departments at Urbana, in 1912-13, 150 out of 446—33.6 per cent.

No associates have been appointed in the departments in Chicago. The three professorial ranks in these departments in 1912-13 numbered 72 out of 141—51.0 per cent.

The number of women in the faculty remained practically the same during the biennium:

1911-12: 54 at Urbana, 12 in Chicago—total, 66

1912-13: 57 at Urbana, 10 in Chicago—total, 67

The following figures, extracted from Tables 25-28 (pages 110-115), show the distribution of the women members of the faculty by departments:

WOMEN MEMBERS OF FACULTY BY DEPARTMENTS

	1911-12	1912-13
Art and design	2	2
English	9	6
Germanic languages	1	1
Romance languages	1	—
History	1	1
Philosophy	—	1
Botany	4	3
Zoology	3	5
Chemistry	2	1
 <i>Total, Arts and Sciences.</i>	 23	 20
Agricultural extension	—	1
Household science	9	11
Music	5	4
Library science	13	16
Physical training	4	5
Medicine	12	10
 <i>Totals</i>	 66	 67

The 54 women teachers at Urbana in 1911-12 included 2 of professorial rank, 4 assistant professors, and 3 associates; and the corresponding number of women for 1912-13, 57, included 2 of professorial rank, 2 assistant professors, and 2 associates; the remaining women teachers in both years belonging to the ranks in which the appointments are annual. In the College of Medicine the number of women in the higher ranks was relatively larger in both years; 3 professors, 1 associate professor, and 2 assistant professors out of 12 women teachers in 1911-12; and 3 professors and 2 assistant professors out of 10 women in 1912-13.

Number in the Faculty, 1868-1913

Table 29 (page 116), which gives the total membership of the faculty for each year since the opening of the University in 1868, is reprinted from President James's Biennial Report of the University in the *Illinois School Report for 1908-1910* (page 564).

This table should be studied together with Table 9 (page 24), which shows the total enrollment of students year by year from 1868 to 1913. See also the discussion of Table 9 on page 10.

For the instruction of its 77 students during the short spring term of 1868 the Illinois Industrial University provided 4 teachers, including, of course, the Regent, who was Professor of Philosophy.

For the first full school year, 1868-69, there were 11 teachers for 128 students; for the second full year, 19 teachers for 180 students. The same number of instructors, 19, taught the 278 students of 1870-71; but 5 more, making a faculty of 24, were added for 1871-72. This addition was timely, since the student enrollment jumped from 278 in 1870-71 to 381 in 1871-72. Thus in the first five years of the University's history the faculty increased in size by 500 per cent.

The number of teachers was, however, to remain in the twenties or lower thirties for nearly two decades. In 1889-90 there were still only 32 in the University faculty, with a student body of 469.

But about the middle of the eighties a rapid growth in numbers began. In 1885-86 there were only 332 students enrolled in the newly christened University of Illinois*—nearly 50 students fewer than in 1871-72 (381); and the faculty numbered only 29—less by 1 than the number for 1874-75. But every year of the decade which began in 1886-87 marked a substantial gain in the number of students, which in 1895-96 reached 855. During the first half of this decade the increasing number of students does not seem to have affected the size of the faculty. In 1889-90, the number of teachers (32) had increased but 3 over the number in the faculty five years before, altho the student body was larger by 41.2 per cent. But for 1890-91 7 additional instructors were employed, and the growth of the faculty from this point on was rapid. By 1895-96 the number of teachers was 84.

Then came the annexations of 1896 and 1897—the School of Pharmacy, the Library School, and the College of Medicine,—with the establishment of the School of Music and the College of Law. From 1895-96 to 1897-98 the student body increased from 855 to 1582 and the faculty from 84 to 184.

The growth of the faculty from 1897-98 to date has been relatively steady; the larger gains coming, for obvious reasons, in alternate years—the years immediately following the biennial sessions of the General Assembly.

The two largest gains for single years occurred in 1901-02 and 1905-06—gains of 55 and 58 teachers respectively.

* A law providing for the change of name was approved June 10, 1885.

PART FIVE. COURSES OFFERED

Part Five contains tabulations showing the number of courses offered in the colleges and schools at Urbana during the biennium.

Courses Offered, 1911-12, 1912-13

Tables 30 and 31 (pages 120 and 122) summarize the courses of instruction which are listed in the "General Description of Courses" in the *Annual Registers* of 1911-12 and 1912-13 as having been offered in those years.

It should be noted that courses listed in the two *Registers* but marked "Not given in"—the year in question, are not counted in these tables, which are designed to show only courses actually taught. Perhaps it should be added that the courses so designated do not by any means represent obsolete material or mere "paper" announcements. They are in most cases advanced courses which are regularly given in alternate years or once in three years, in accordance with departmental schedules carefully planned to insure that every student likely to be interested shall have an opportunity to get the work at a suitable point in his course. The number of such courses listed in the *Register* for 1911-12 was 69 (44 open to undergraduate students, 25 for graduates only). The corresponding number for 1912-13 was 73 (41 open to undergraduates, 32 for graduates alone).

Attention should also be called emphatically to the fact that these figures do not afford a basis for a comparison of the "amounts of instruction" given by the several departments, for the reason that each course listed in the *Register* is counted simply as one course, without discrimination as to whether it was a one-hour course (meeting only once a week for a semester of eighteen weeks) or a two-hour, or three-hour, or four-hour, or five-hour course (meeting two, or three, or four, or five times a week for the same period); and without discrimination also between one-semester and two-semester courses.

These tables serve, however, to indicate, more or less imperfectly, the *scope* of the work of the several departments and colleges and of the institution as a whole, and it is hoped that this point may be of interest.

The total number of courses offered in the departments at Urbana in 1911-12 was 959; in 1912-13, 981.

Of the 959 courses given in 1911-12, 759 were open to undergraduates, while 200 were courses for graduate students only. In 1912-13, the courses for undergraduates numbered 775 out of 981, the graduate courses 206.

As will be evident from the small difference in the grand totals, there was but slight variation in the number of courses offered by single departments from one year of the biennium to the other—in most cases a matter of one or two courses only. The following departments offered as many as 5 courses more in 1912-13 than in 1911-12.

	1911-12	1912-13
English	46	51
Political science	16	21
Physics	19	20
Chemistry	60	71

Music is credited with 37 courses in 1912-13 as against 27 in 1911-12; but this increase in offerings is apparent rather than real, resulting from the fact that certain work which had been given for some years was in 1912-13 differentiated into a larger number of courses for purposes of more accurate record.

The number of courses offered in liberal arts and sciences (among which physics, altho administered by the College of Engineering, is here included) increased from 540 in 1911-12 to 565 in 1912-13. On the other hand, there was a slight decrease from the first to the second year of the biennium in the number of courses offered in engineering subjects—192 in 1911-12, 184 in 1912-13; and likewise in agricultural subjects—115 in 1911-12, 110 in 1912-13.

The following figures, extracted from Tables 30 and 31 (pages 120-122), show the distribution of the courses in liberal arts and sciences among the several subject groups:

	1911-12	1912-13
Art and design.....	13	13
Language and literature (classics, Romance languages, Germanic languages, English).....	145	149
Political and social sciences (history, economics, political science, sociology).....	96	101
Philosophical subjects (philosophy, psychology, education).....	42	40
Mathematics	34	31
Physical sciences (astronomy, geology, physics, chemistry).....	118	139
Biological sciences (zoology, botany, entomology, physiology).....	73	73
Ceramics	19	19
 <i>Totals</i>	 540	 565

Courses Offered, Summer Sessions of 1912, 1913

Tables 32 and 33 (pages 124 and 125) show the number of courses offered by the several departments in the two Summer Sessions of the biennium.

The total number of courses offered in the summer of 1912 was 139; in the summer of 1913, 167.

Of the 139 courses of 1912, 117 were offered for undergraduate credit only; 14, while listed as advanced undergraduate courses, were open to graduate students also for credit; and 8 were for graduates only.

In 1913, 135 out of the 167 courses were exclusively undergraduate, 24 were open to both advanced undergraduates and graduates, and 8 required graduate status for admission.

There was thus an increase for the second summer of 28 in the number of undergraduate courses, and an increase of 10 in the number of courses offered for graduate credit.

The number of departments represented in the Summer Session was the same for both years—26; and the departments themselves were the same, except that geology, which was represented in 1912 by two courses in physiography, offered no work in 1913, and household science, which was not able to give summer work in 1912 because of changes being made in the quarters of the department (incident to the erection of the addition to the Woman's Building), offered 5 courses in 1913.

In the main, of course, the offerings of individual departments show little variation from the one year to the other. The notable increases for the second year were in education and psychology (grouped together as one department for their summer work)—11 courses in 1912, 18 in 1913; and in chemistry—17 courses in 1912, 24 in 1913. Physical training, which offered 5 courses in 1912, offered 1 only in 1913.

The following figures from Tables 32 and 33 (pages 124 and 125) show the distribution of summer courses among the several subject groups:

	1912	1913
Art and design.....	2	2
Language and literature (Latin, French, German, English).....	33	36
Political and social sciences (history, economics, political science, sociology)	12	17
Education and psychology	11	18
Mathematics	9	10
Physical sciences (physics, chemistry, physiography).....	29	35
Biological sciences (zoology, botany, entomology).....	10	13
Engineering subjects (general engineering drawing, manual training, mechanical engineering, mechanics).....	12	12
Agriculture	5	8
Household science	—	5
Music	5	3
Library science	6	7
Physical training	5	1

INDEX

A.B.Degrees

- conferred, 92, 93, 94
- held by students, 37, 71, 74
- Academies**
 - foreign countries, 62, 70
 - Illinois, 58, 66
 - Insular Possessions, 70
 - other states, 61, 68
- Academy, U. of I., 10**
- Accountancy, courses offered, 120, 122, 124, 125**
- Accredited high schools, intrants from, 35, 56, 63**
- Adams county**
 - degrees, 92, 95, 100
 - students from, 33, 41, 48
- A.E. degrees held by students, 37, 71, 74**
- Africa**
 - degrees, 92, 102
 - students from, 46, 54, 62, 70
- Ages of students, 39, 86**
- Agricultural and mechanical colleges, graduates of, 30**
- Agricultural extension**
 - courses offered, 121, 123
 - faculty, 107, 112, 114
- Agriculture, College of**
 - ages of students, 86
 - occupations of students' parents, 78
 - courses offered, 118, 119, 121, 123, 124, 125
 - degrees, 91, 93, 94
 - enrollment, 7, 8, 11, 12, 13, 14, 16, 18, 19, 21
1890-1913, 26, 28, 30, 32
 - faculty, 105, 110, 112, 114
 - general course, enrollment, 14, 16, 18
 - percentage of loss, 9
- Agriculture, general, women in, 9**
- Agriculturists, *see* occupations**
- Agronomy**
 - courses offered, 121, 123
 - faculty, 106, 112, 114
- Alabama**
 - students from, 44, 52, 59, 61, 68
 - degrees, 96
- Alexander county**
 - degrees, 95
 - students from, 41, 48
- A.M. degrees**
 - conferred, 93, 94
 - held by students, 37, 71, 74
- Animal husbandry**
 - courses offered, 121, 123
 - faculty, 105, 106, 112, 114
- Architecture**
 - courses offered, 121, 123
 - enrollment, 8, 14, 16, 18
 - faculty, 106, 112, 114
 - women in, 9
- Architectural engineering course, enrollment, 8, 14, 16, 18**
- Argentina**
 - degrees, 92, 96
 - students from, 46, 54, 62, 70
- Arizona, students from, 44, 52, 59, 68**
- Arkansas**
 - degrees, 96, 102
 - students from, 44, 52, 59, 66, 68
- Armenia, students from, 46, 54**
- Art and design**
 - courses offered, 118, 119, 120, 122, 124, 125
 - enrollment, 1890-1909, 26, 28, 30
 - faculty, 107, 112, 114
- Artistic professions, *see* occupations**
- Asia, students from, 46, 54**
- Astronomy**
 - courses offered, 118, 120, 122
 - faculty, 112, 114
- Australia, students from, 46**
- Austria, students from, 46, 54**
- Baccalaureate degrees, 91, 93, 94**
 - held by students, 37, 71, 74
- B.C.E., degrees held by students, 37, 71, 74**
- B.D., degrees held by students, 37, 71, 74**
- Biological sciences, courses offered, 118, 119, 121, 123, 124, 125**
- Biological station, enrollment, 29**
- B.L. degree, 91, 94**
- B.L.S. degrees**
 - conferred, 93, 94
 - held by students, 37, 71, 74
- Bohemia, students from, 54**
- Bond county**
 - degrees, 100
 - students from, 41, 48
- Boone county**
 - degrees, 95, 100
 - students from, 41, 48
- Botany**
 - courses offered, 118, 119, 121, 123, 124, 125
 - faculty, 105, 106, 107, 112, 114
- Brazil, students from, 54, 70**
- British Guiana, students from, 46**
- Brown county**
 - degrees, 95
 - students from, 41, 48
- B.S. degrees**
 - conferred, 93, 94
 - held by students, 37, 71, 74
- Bulgaria, students from, 54**
- Bureau county**
 - degrees, 100
 - students from, 33, 41, 48
- Burrill, Dr. Thomas J., 91**
- Business, *see* occupations**
- Business courses**
 - enrollment, 8, 14, 16, 18
 - organization, 10
 - women in, 9
- Business management, *see* occupations**
- Calhoun county**
- California**
 - degrees, 96, 102
 - students from, 33, 41, 44, 48, 52, 59, 61, 66, 68
- Canada**
 - degrees, 92, 96, 102
 - students from, 34, 46, 54
- Carroll county**
 - degrees, 95
 - students from, 41, 48
- Cass county**
 - degrees, 95, 100
 - students from, 41, 48
- C.B. degrees held by students, 37, 71, 74**
- C.E. degrees held by students, 37, 71, 74**
- Central America, students from, 46**
- Ceramic engineering, enrollment, 8, 14, 16, 18**
- Ceramics**
 - enrollment, 8, 14, 16, 18
 - courses offered, 118, 121, 123
- Champaign county**
 - degrees, 92, 95, 100
 - students from, 33, 41, 48
- Chemical engineering course, enrollment, 8, 14, 16, 18**
- Chemistry**
 - courses offered, 117, 118, 119, 120, 122, 124, 125
 - enrollment, 8, 14, 16, 18
 - faculty, 105, 106, 107, 112, 114
 - women in, 9
- China**
 - degrees, 92, 96, 102
 - students from, 34, 46, 54, 62, 70
- Christian college**
 - degrees, 91, 95, 100
 - students from, 41, 48
- Civil engineering**
 - courses offered, 118, 121, 123
 - enrollment, 14, 16, 18
 - faculty, 106, 112, 114
- Clarendon county**
 - degrees, 95, 100
 - students from, 41, 48

- Classes**
 ages of students by, 86, 88
 comparative enrollment, 19
- Classes and courses, enrollment by**, 14, 16
- Classics**
 courses offered, 118, 119, 120, 122, 124, 125
 faculty, 112, 114
- Clay county**
 degrees, 100
 students from, 41, 48
- Clinton county**
 degrees, 100
 students from, 41, 48
- Coles county**
 degrees, 100
 students from, 41, 48
- Colleges**
 enrollment by, 11, 12, 13
 enrollment, 1890-1913, 26, 32
- Colleges and Universities**
 Illinois, intrants from, 35, 59, 66
 foreign countries, intrants from, 36, 61, 62, 70
 other states, intrants from, 36, 61, 68
- Colorado**
 degrees, 96, 102
 students from, 44, 52, 59, 61, 66, 69
- Comparative enrollment**
 by classes, 19
 by courses, 18
- Composition of student body (Part Two)**, 33, 90
- Composition of undergraduate colleges**, 121
- Connecticut**, students from, 44, 52, 69
- Contents, table of**, 5
- Cook county**
 degrees, 92, 95, 100
 students from, 33, 41, 48
- Costa Rica**, students from, 46
- Counties in Illinois**
 degrees, 95, 100
 students from, 33, 41, 43, 48, 51
- Courses, comparative enrollment**, 8, 18
- Courses and classes, enrollment by**, 14, 16
- Courses offered, (Part Five)** 117, 125.
- Crawford county**
 degrees, 95, 100
 students from, 41, 48
- Cuba**
 degrees, 92, 96, 102
 students from, 46, 54
- Cumberland county**
 degrees, 100
 students from, 41, 48
- Cunningham, H. E.**, 3
- Dairy Husbandry**
 courses offered, 121, 123
 faculty, 106, 112, 114
- Degrees, enumeration**, 91
 summary, 91, 93, 94
 geographical distribution, 92, 95, 100
 held by students
 classification, 37
 classification of institutions, 36
 percentage of, 36, 71, 74
- Dekalb county**
 degrees, 95, 100
 students from, 41, 48
- Delaware**, 34, 44, 52
- Devonshire**, students from, 54
- Denton, George F.**
 degrees, 91, 93
 enrollment, 7, 11, 12, 14, 20
 total, 11, 12, 13
 faculty, 105, 110
 percentage, 11
 students, 9
- District statement of enrollment**, 14, 16
- Dewitt county**
 degrees, 95, 100
 students from, 41, 48
- District of Columbia**, students from, 44, 52, 59, 61, 66, 69
- Degrees' degrees held by students**, 37
- Douglas county**
 degrees, 100
 students from, 41, 48
- Drawing, General engineering**
 courses offered, 119, 121, 123, 124, 125
 faculty, 112, 114
- DuPage county**
 degrees, 95, 100
 students from, 41, 48
- Economics**
 courses offered, 118, 119, 120, 122, 124, 125
 faculty, 106, 112, 114
- Edgar county**
 degrees, 92, 95, 100
 students from, 33, 41, 48
- Education**
 courses offered, 118, 119, 120, 122, 124, 125
 faculty, 112, 114
- Edwards county**
 degrees, 95
 students from, 41, 48
- E.E. degrees**
 conferred, 93, 94
 held by students, 37, 71, 74
- Effingham county**, students from, 41, 48
- Egypt**, students from, 46
- Electrical engineering**
 enrollment, 14, 16, 18
 courses offered, 121, 123
 faculty of, 106, 112, 114
- Engineering, College of**
 ages of students, 86
 courses offered, 118, 119, 121, 123, 124, 125
 degrees, 92, 93, 94
 enrollment, 7, 8, 11, 12, 13, 14, 15, 16, 18, 19, 21
 1890-1913, 26, 28, 30, 32
 faculty, 105, 110, 112, 114
 occupations of students' parents, 78
 percentage of loss, 9
- Engineering, professional degrees held by students**, 37
- England**, students from, 62
- English**
 courses offered, 117, 118, 119, 120, 122, 124, 125
 faculty, 105, 106, 107, 112, 114
- Enrollment**
 by colleges, 11, 12, 13
 1890-1913, 26, 32
 increase in, 1868-1913, 10, 25, 25, 26
 largest, 10
 Part One, 7, 32
 percentage of men and women, 8
 total, 1868-1913, 24, 25
- Entomology**
 courses offered, 118, 119, 121, 123, 124, 125
 faculty, 112, 114
- Europe**, students from, 46, 54
- Faculty, (Part Four)**, 105-116
- Fayette county**
 degrees, 95
 students from, 41, 48
- Financial and semi-legal business**, see occupations
- Florinstitute**, courses offered, 121, 123
- Florida**, students from, 44, 52
- Ford county**
 degrees, 95, 100
 students from, 41, 48
- Foreign countries**
 degrees, 92
 intrants from, 56, 62, 63, 70
 students from, 34, 41, 46, 48, 54
- Franklin county**, students from, 41, 48
- French**, courses offered, 119, 120, 122, 124, 125
 (see also Romance languages)
- Freshman class**
 ages of students, 87
 enrollment, 15, 17, 19
- Gulf of county**
 degrees, 95, 100
 students from, 33, 41, 48

- Gain or loss of students by colleges, 7**
Gallatin county, students from, 41, 49
Geographical distribution
 degrees, 92, 95, 100
 students, 33, 34, 41, 48
Geology
 courses offered, 118, 120, 122
 faculty, 112, 114
Georgia
 degrees, 102
 students from, 44, 52
Germanic languages
 courses offered, 118, 119, 120, 122, 124, 125
 faculty, 106, 107, 112, 114
Germany, students from, 46, 54, 64
Government service, see occupations
Graduates, college or university, enrollment of, 36, 71, 74
Graduate School
 ages of students, 86
 enrollment, 7, 11, 12, 13, 14, 15, 20
 1890-1913, 26, 28, 30, 32
 organization, 10
 parentage of degrees, 36, 71, 74
Great Britain, students from, 46, 54
Greece, students from, 46, 54
Greene county
 degrees, 95, 100
 students from, 41, 49
Greek, courses offered, 120, 122 (see also Classics)
Growth, 1868-1913, 10, 24, 25, 26
Grundy county
 degrees, 95, 100
 students from, 41, 49

Hamilton county, students from, 33, 41, 49
Hancock county
 degrees, 92, 95, 100
 students from, 41, 49
Hardin county, students from, 33, 41, 49
Hawaii, students from, 46, 54
Henderson county
 degrees, 100
 students from, 41, 49
Henry county
 degrees, 95, 100
 students from, 41, 49
High schools, accredited
 Illinois, 56, 63
 intrants from, 35, 56, 63
 in other states, intrants from, 36, 59, 66
History
 courses offered, 118, 119, 120, 122, 124, 125
 faculty, 106, 107, 112, 114
Holland, students from, 46, 54
Honorary degrees, 91, 93
Horticulture
 courses offered, 121, 123
 faculty, 105, 106, 112, 114
Household science
 courses offered, 119, 121, 123, 124, 125
 enrollment, 8, 14, 16, 18
 1890-1905, 26, 28

UNIVERSITY OF ILLINOIS
BUSINESS OFFICE

FINANCIAL REPORT FOR THE BIENNIUM
ENDING JUNE 30, 1913

Published by the University
Urbana, Illinois
1913

August 21, 1913

EDMUND J. JAMES, President
University of Illinois

SIR

I have the honor to submit herewith a financial report for the biennium ending June 30th, 1913, together with a balance sheet and supporting schedules showing the status of University property as at June 30th, 1913.

Financial Reports of the University

The present report is the first one of its kind to be issued by the University. The Comptroller of the University has for a number of years made a quarterly report to the Board of Trustees, showing the cash transactions for the quarter and the cash balance in each of the appropriations passed by the Board. The Comptroller of the University has also made a quarterly report to the Governor of the State, showing the cash transactions in each of the State appropriations, together with a list of warrants issued under each State appropriation. Further than this, financial reports have been made annually to the Department of the Interior and the Department of Agriculture of the United States government, covering the cash transactions in the United States grants made to the University. The Secretary of the Board of Trustees has appended to the printed minutes of the Board of Trustees a list of the University warrants issued during the year.

In addition to the quarterly and annual financial reports made by the officers of the Board, a report is made at the close of each quarter to the Finance Committee of the Board by a firm of auditors, which has been employed to audit the accounts of the University. These auditors' reports have been of value in proving at the close of each quarter the correctness of the balances in the various University accounts.

All of these reports have served to acquaint the officers of the United States, of the State, and of the University with the financial transactions of the institution. The present report is intended to furnish the members of the Board of Trustees and the citizens of the State further information, both summarized and in detail, concerning the financial transactions of the University.

The Business Office During the Biennium

Professor Samuel Walker Shattuck, C.E., LL.D., served as Business Agent and as Business Manager from 1873 to 1905 and as Comptroller from 1905 to Sept. 1st, 1912. It is not within the province of the writer of this report to speak of the long period of useful service that Professor Shattuck gave to the University. It is a pleasant duty to record that the books of the Business Office, as maintained under the direction of Professor Shattuck, have been found to be accurate and trustworthy in all respects.

From September 1st, 1912, to January 13th, 1913, the responsibilities of the office of Comptroller rested upon Mr. O. E. Staples, Chief Clerk (now Bursar), and Mr. Lloyd Morey, Bookkeeper (now Auditor). The present Comptroller assumed office January 13th, 1913.

The Accounts of the Business Office

Up to January 13, 1913, the accounts of the Business Office were confined to accounts with the various appropriations and allotments made by the Board of Trustees. It was the purpose of the accounts to show the allotments made by the Board, the disbursements from the allotments, and the balances in the allotments at any given date. In addition to disbursement accounts, cash receipts were recorded by sources. During the biennium, the Purchasing Agent in the Business Office, Mr. Nathaniel Hay, maintained a file of outstanding orders indexed by Board allotments.

Commencing with January, 1913, an analysis ledger was introduced, so as to show the cost elements in the disbursements under each Board appropriation. This analysis was carried back so as to analyze the disbursements into the cost elements from July 1st, 1912.

The various schedules of receipts and disbursements shown in this report have been assembled from the accounts referred to above. These schedules, therefore, represent an analysis of accounts. Commencing with July 1st, 1913, accounts have been introduced in the Business Office with all of the items shown in this report, so that the next biennial report will represent totals in the accounts in the Business Office.

The balance sheet and property schedules are the result of a complete inventory made as of June 30th, 1913. At the present time a perpetual inventory is being installed in the Business Office, covering all of the property of the University. This perpetual inventory will be carried back so as to date from July 1st, 1913.

Character of the Report

The report is made up of the following parts:

1. Cash summary and proof of cash balances
2. Receipts
3. Disbursements
4. Trust Fund transactions
5. Refunds and transfers
6. Analysis of disbursements by cost elements
7. Board appropriations for the biennium
8. Unencumbered balances in Board appropriations, as at the
the close of the biennium
9. Balance sheet and property schedules

As far as possible, the schedules have been made self explanatory. Each of the parts of the report and several of the schedules are preceded by brief explanatory statements.

In presenting this report, it is a pleasure to record my indebtedness to Mr. Lloyd Morey, Auditor of the Business Office, for his assistance in the preparation of the schedules of receipts and disbursements, and to Mr. Lynn E. Knorr, Assistant Comptroller, for his assistance in the preparation of the balance sheet and property schedules.

Respectfully submitted,

GEORGE E. FRAZER

Comptroller

PART ONE

CASH SUMMARY

The financial transactions of the University for the biennium ending June 30th, 1913, are summarized in the first schedule of the report, the Cash Summary. The cash balances shown in this Cash Summary are the cash balances as shown by the books of the Business Office. A letter is submitted herewith from M. W. Busey, Treasurer, showing the cash balances as shown by the books of the Treasurer. A letter is also submitted herewith from the United States Audit Company, signed by Whitney B. Flershem, Certified Public Accountant, giving the reconciliation between the cash balances as shown by the University Treasurer and as shown by the Business Office.

Especial attention is called to the difference between the total cash balance as shown by the University Treasurer, \$425,548.11, and the Treasurer's cash balance as shown by the Business Office, \$277,996.02. This difference of \$147,552.09 represents the outstanding warrants regularly issued upon the University Treasurer by the Business Office, but not as yet presented to the Treasurer for payment, less the \$15 item in the School of Pharmacy fund not credited by the Treasurer. It is the bookkeeping practice in the Business Office to enter an item as paid when the warrant on the University Treasurer is regularly issued.

TREASURER'S STATEMENT

AUGUST EIGHTEENTH, 1913

HONORABLE ALLEN F. MOORE, Chairman Finance Committee
Board of Trustees, University of Illinois

DEAR SIR:

I submit herewith a statement of the cash balances in the several University funds, as shown by my accounts at the close of business, June 30, 1913.

General Fund	\$409,550.14
Agricultural Experiment Station Fund...	4,223.68
College of Medicine Fund	8,553.59
School of Pharmacy Fund	3,220.70
<i>Total</i>	\$425,548.11

Respectfully submitted,

(Signed) M. W. BUSEY

Treasurer

AUDITOR'S RECONCILIATION

AUGUST EIGHTEENTH, 1913

HONORABLE ALLEN F. MOORE, Chairman Finance Committee
Board of Trustees, University of Illinois

DEAR SIR

Following your instructions, we have audited the accounts of the University Treasurer and of the Business Office of the University, as at June 30, 1913.

We present herewith a reconciliation between the cash balance as shown by the University Treasurer and as shown by the Business Office.

GENERAL FUND:

Balance as per books of Treasurer.....	\$409,550.14
Deduct: Unpaid warrants.....	\$133,349.01
Transfer from United States Agricultural Experiment Station Fund, not made by Treasurer.....	447.81
Item credited by Treasurer to General Fund instead of to College of Medicine Fund	30.90
	133,827.72
Balance as per books of Business Office	\$275,722.42

COLLEGE OF MEDICINE FUND:

Balance as per books of Treasurer.....\$ 8,553.59	
Add: Item credited by Treasurer to General Fund instead of to College of Medicine Fund.....	
30.90	\$ 8,584.49
Deduct: Unpaid warrants.....	9,618.53
Balance as per books of Business Office—Overdraft	\$ 1,034.04

SCHOOL OF PHARMACY FUND:

Balance as per books of Treasurer.....\$ 3,220.70	
Add: Item not credited by Treasurer... 15.00	
	\$ 3,235.70
Deduct: Unpaid warrants.....	1,068.83
Balance as per books of Business Office	\$ 2,166.87

UNITED STATES AGRICULTURAL EXPERIMENT STATION FUND:

Balance as per books of Treasurer.....\$ 4,223.68	
Add: Transfer to General Fund not made by Treasurer.....	
447.81	\$ 4,671.49
Deduct: Unpaid warrants.....	3,530.72
Balance as per books of Business Office	\$ 1,140.77

Total cash as per books of Business Office (Page 7) \$277,000.02

Yours very truly,

Authorized and approved:

C. M. HENRY L. HERZ
President

UNITED STATES AUDIT CO.

(Signed) WHITNEY B. FLERSHEM

UNITED STATES GRANTS

Land Grant of 1862

This act donated certain public lands to states providing colleges of Agriculture and Mechanic Arts. The amount accrued to the University of Illinois to date is \$647,401.53. On account of the defalcation of the University Treasurer in 1897, the State assumed, by an act of June 11, 1897, the liability for this fund, and interest is paid thereon semiannually by the State.

Morrill Fund

The Morrill Fund was created by an act of Congress on August 30, 1890, and constituted an appropriation of \$15,000 for the fiscal year ending June 30, 1890, and an annual increase of \$1,000 for ten years. The present appropriation to the University under the Morrill Act is, therefore, \$25,000 per year. The fund may be used for instruction and facilities in Agriculture, Mechanic Arts, Mathematical Sciences, Natural and Physical Sciences, English Language, and Economic Sciences. The entire amount of the fund for each year is paid annually to the State Treasurer by the United States Treasurer and is in turn paid to the University Treasurer upon the requisition of the Board of Trustees.

Nelson Fund

This fund was created by an act of Congress dated March 4, 1907, and carried with it an appropriation of \$5,000 for the fiscal year ending June 30, 1908, and an annual increase of \$5,000 for four years. The present appropriation to the University under the Nelson Act is, therefore, \$25,000 per year. Its uses are identical with those of the Morrill Fund, and the method of payment to the University of Illinois is also the same.

Hatch Fund

This fund was created by an act of Congress dated March 2, 1881, and provides for appropriations of \$15,000 per year, payable in equal quarterly installments on the first of January, April, July, and October to the Treasurer of the University by the Treasurer of the United States. The purpose of the appropriation is the publication of useful and practical information on agricultural subjects and the investigation of scientific problems of agriculture.

Adams Fund

This fund was created by an act of Congress dated March 16, 1906, and provides for an appropriation of \$5,000 for the year ending June 30, 1906, and an increase of \$2,000 for five years. The present appropriation to the University under the Adams Act is, therefore, \$45,000 per year. The method of payment is the same as that of the Hatch Fund and its use is limited to the necessary expenses of original research and experimental work in agriculture.

RECEIPTS FROM STATE APPROPRIATIONS

The receipts from State appropriations shown in the following schedule represent moneys paid over from the State Treasurer to the University Treasurer on account of appropriations made by the Legislature in 1911.

The moneys received on account of State appropriations are classified so as to show the amounts available only for additions to capital, and the amounts available both for additions to capital and for operation and maintenance of the various departments of the University. It will be noted that the receipts on account of State appropriations were \$1,860,400.00 in 1911-1912, as over against \$1,568,900.00 in 1912-1913. The excess of the receipts of the first year of the biennium over those of the second year is accounted for by the fact that the appropriations available only for additions to capital were very largely drawn upon during the first year of the biennium.

The schedule showing the receipts from State appropriations includes only those items representing direct expenditures of State money on behalf of the University. The State Legislature makes an appropriation at each session of an amount representing five per cent interest on the Endowment Fund of the University. This amount is included in the schedule of receipts from United States grants under the title of "Land Grant of 1862" and is there explained. The State Legislature at each session also re-appropriates to the University money paid by the United States government into the State Treasury for the benefit of the University. The receipts shown in the schedule headed "Receipts from State Appropriations" are exclusive both of the interest on the Endowment Fund and of the re-appropriation of moneys from United States grants.

**RECEIPTS FROM STUDENT FEES AND
DEPARTMENTAL SALES**

Since the organization of the University in 1867, all moneys received by the University on account of tuition or on account of sales of products or of equipment by any of the University departments have been deposited with the University Treasurer. These moneys do not pass into the hands of the State Treasurer. It is customary to speak of these receipts as the "Current Receipts" of the University and the title "Current" is used in several of the schedules of this report to indicate receipts of this character.

It will be noted that the receipts from student fees from the departments at Urbana were \$121,669.46 in 1911-1912 and \$125,230.20 in 1912-1913. This slight increase is explained by the increase in the number of students in the departments of the University at Urbana.

It will be noted that the receipts from student fees in the College of Medicine were \$92,193.25 in 1911-1912 and \$22,607.01 in 1912-1913. The figure given for 1912-1913 represents the cash receipts paid into the hands of the University Treasurer from March 1st, 1913, to June 30th, 1913. From July 1st, 1912, to February 28th, 1913, the University main-

SALES (CONTINUED)**

tained no College of Medicine. On March 1st, 1913, the property of the College of Physicians and Surgeons of Chicago was presented to the University as a gift. The property presented is subject to a mortgage encumbrance of \$245,000. The liability for this encumbrance was not assumed by the University.

The receipts from departmental sales represent the sale of products manufactured or produced by the University as a result of its experimental and instructional work. It will be noted that the greater part of such receipts arise from the operations of the Agricultural College. For example, the Agricultural College maintains a creamery and dairy milk route in connection with the department of Dairy Husbandry. The receipts from these University departments should be considered when reference is made to the cost of operating the departments. For example, the disbursements for the operation of the department of Dairy Husbandry for the year 1912-1913 are shown as \$98,466.54. When referring to this item it should be borne in mind that the receipts for the department of Dairy Husbandry for the same year were \$38,072.78, (as shown by the schedule of the Agricultural College Receipts).

CAPITAL DISBURSEMENTS

The following schedule of "Capital Disbursements" shows the amount of money paid out by the University during each year of the biennium on account of various additions to its plant and equipment. The capital disbursements shown do not represent the entire cost to the University of the items listed. For example, disbursements are shown for the new Armory building of \$369.40 during 1911-1912, and of \$77,622.33 during 1912-1913, a total for the biennium of \$77,991.73. This amount does not represent the cost of the new Armory building, as the building on June 30th, 1913, was still in the first stages of its permanent construction.

The disbursements for additions to equipment are classified as between "General University Furniture and Fixtures" and "Departmental Equipment". All laboratory apparatus, tools, and machinery, and all furniture of special construction is classed as "Departmental Equipment."

CAPITAL DISBURSEMENTS (CONTINUED)

Especial attention is called to the schedule of "Disbursements for Departmental Equipment". These disbursements are shown by colleges and administrative offices, and by departments in each college. In a separate schedule are given the disbursements for the purchase of books from departmental expense allotments.

With reference to the schedule of capital disbursements on account of the museum of Natural History and the museum of Classical and European Culture, it should be borne in mind that these museums have been enriched by gifts to the University from friends throughout the State and by gifts from members of the faculty. The value of such gifts to the University is very great, but, because of the unique character of museum specimens, no attempt has been made to fix a monetary value on such gifts.

Disbursements for such expendable supplies as laboratory and office supplies are not included under the heading "Capital Disbursements". These disbursements will be found included in the expense items of the various schedules of "Operation and Maintenance Disbursements".

DISBURSEMENTS FOR OPERATION AND MAINTENANCE

The following schedule shows the disbursements for operation and maintenance of the various divisions and colleges of the University. It should be carefully borne in mind that the figures shown for the various colleges and schools do not include any of the cost of maintaining buildings and grounds, or of heating and lighting the buildings. These costs are shown under the heading of "Physical Plant". Nor do the amounts given for the various colleges and schools include any share of the cost of the general administration of the University, or of the cost of such general University departments as the department of Physical Training, the Office of the Dean of Men, or the University Library. Further, it should be noted that the figures given do not include any allowance for the depreciation of buildings and equipment used by any of the colleges and schools, or for the loss of permanent equipment. The figures given represent disbursements in total costs. It is thought that the figures may be useful in so far as they show the apportionment of available funds between the different interests of the University.

The following schedules, showing net disbursements on account of operation and maintenance expenses of the various University interests, will be found largely self-explanatory. In the main schedule, the various University interests are grouped under the following headings:

Administration,
General University Departments and Expenses,
Colleges and Schools,
Auxiliary Departments,
Physical Plant.

Under the heading "Administration" will be found the disbursements on account of the administrative offices, with the exception of the Office of the Supervising Architect. Disbursements on account of the Office of the Supervising Architect are included under the heading, "Physical Plant at Urbana". Attention is also called to the fact that the Registrar of the University served during the biennium as Secretary of the Board of Trustees. In considering the disbursements on account of the Registrar's Office, it should be kept in mind, therefore, that a considerable part of these disbursements should be considered as expenses of the Secretary of the Board of Trustees.

Such University interests as the University Library and the Office of the Dean of Men are to be found grouped under the heading, "General University Departments". All of the departments so grouped are conducted for the benefit of the work of all the colleges and schools of the University. For example, the University Library and the University Gymnasium were conducted during the biennium quite as much for the College of Agriculture or for the College of Engineering as for the College of Literature and Arts.

The disbursements on account of the Courses in Commerce will be found listed in the schedule for the College of Literature and Arts. The disbursements on account of the Courses in Ceramics will be found listed in the schedule of the College of Science. The disbursements on account

of the Department of Mining Engineering will be found listed in the schedule for the College of Engineering. Especial mention is made of these items because of the fact that separate State appropriations were made for their support.

Under the heading, "Auxiliary Departments", will be found those activities over which the University has supervision, such as the Committee for the Examination of Candidates for the Degree of Certified Public Accountant. These interests are not a part of the instructional work of the University.

No attempt is made to show the cost of instruction for a student in any college or school. In making any such computation it should be borne in mind that the entire function of the University does not center in the instruction of the students who are in attendance at any given date. A great deal of the cost of administration is due to the making of provision for University work in the future. A very considerable part of the cost of general University departments is incurred because of the work that the University is carrying on in investigation and research. So again a part of the expense of each college and of each department represents the expense chargeable rather to scientific investigation and research than to the instruction of students. It is a difficult task to separate the cost of providing for scientific investigation from the cost of the instruction of students because the two are inseparably connected in the organization and in the daily work of the institution.

Granted that it would be possible to separate the cost of instruction from the cost of investigation and research, a still further problem of great difficulty presents itself in the pro rating of costs to the various colleges. The College of Literature and Arts, for example, during the biennium, was engaged in the instruction of numerous classes of students from the College of Agriculture and from the College of Engineering, as well as of students registered in the College of Literature and Arts alone.

It will be seen, for example, that any attempt to set out the cost of instruction in the College of Agriculture involves four problems of great difficulty. In the first place, the cost of general University administration and of the general University departments must be pro rated so that the proper share of the cost is borne by the College of Agriculture. In the second place, the College of Agriculture must be charged with the depreciation in value of the buildings and equipment that it uses. In the third place, the cost of scientific investigation and of agricultural extension must be separated from the cost of instruction. In the fourth place, the College of Agriculture must be charged with that share of the cost of the College of Literature and Arts and of the College of Science that the two latter colleges have incurred because of the presence of students from the College of Agriculture in their classes.

**DISBURSEMENTS FOR OPERATION AND MAINTENANCE
COLLEGE OF MEDICINE**

The disbursements for Operation and Maintenance of the College of Medicine are shown in two separate schedules. In the first of these schedules, the actual disbursements made from the University Treasury are shown. In the second schedule, the total disbursements on account of the college is shown. The College of Medicine of the University of Illinois was operated from July 1st, 1911, to June 30th, 1912, and from March 1st, 1913, to June 30th, 1913. From July 1st, 1912, to February 28th, 1913, the same college was operated as the private property of the College of Physicians and Surgeons of Chicago. The stockholders of the corporation of the College of Physicians and Surgeons donated the entire stock of that corporation and all of its assets to the University in February, 1913.

PART FOUR

TRUST FUND TRANSACTIONS

The following schedule shows the operation of funds held in trust by the Board of Trustees, all of which are funds from which loans are made to students.

Snyder Fund

On March 14, 1899, Edward Snyder, Professor Emeritus of German in the University of Illinois, gave the University the sum of \$12,000 to be loaned to worthy students to enable them to finish their work in the University. The amount of the fund is now \$12,500, and loans from it bear interest at the rate of five per cent per annum. This interest is payable to the wife of the donor until her death, after which it is to be added to the principal.

McKinley Fund

On October 3, 1912, Honorable William B. McKinley of Champaign, Illinois, presented to the University personal notes from students and former students for the purpose of establishing a student loan fund. Loans from this fund bear interest at the rate of five per cent per annum, which is added to the principal. The amount of the fund at July 1, 1913, was \$12,885.75.

Woman's League Fund

The Woman's League of the University of Illinois, in 1911, established a fund from which loans may be made to girl students at the University. The total amount of the fund, including interest reverting to the principal, on July 1, 1913, was \$437.45.

Class of 1895 Fund

The Class of 1895 established a loan fund as a class memorial, the amount of which on July 1, 1913, was \$130.78.

PART FIVE

REFUNDS AND TRANSFERS

The following schedules of "Refunds" and of "Inter-Departmental Transfers" are given here largely as a matter of record. Since these refunds and transfers have been subtracted from the items in the schedules of receipts and disbursements that they affect, the preceding schedules in this report represent only net cash transactions.

Especial attention is called to the schedule of "Refunds of Receipts". Tuition, matriculation, and other fees paid by students are refunded in part to students who withdraw from the University. The Snyder Fund deposits consist of moneys loaned to students from the Edward Snyder Loan Fund, and deposited by the students with the Bursar in the Business Office. When such moneys were later drawn by the students, they were entered as "Refunds of Receipts on account of the Snyder Fund Deposits".

Refunds of disbursements include all re-payments to the University of moneys paid out in error, and include also all re-payments to the University of moneys paid for goods returned to vendors because of defective quality.

The term "Inter-Departmental Transfers" is used to mean a transfer of supplies from one department to another. Up to July 1, 1913, it was the custom of the Business Office to credit such transfers as a cash receipt of the department giving out the supplies and to charge such transfers as a cash disbursement of the department receiving the supplies. These fictitious cash entries were necessary in order to show the proper cash balance in the various department Board appropriation accounts. Commencing with July 1, 1913, such transfers will be treated as transfers of stores rather than as transfers of cash.

PART SIX

ANALYSIS OF DISBURSEMENTS

In the following pages, the disbursements of the University for each year of the biennium are shown classified according to cost elements. The disbursements for each cost element are further classified so as to show the amount disbursed from grants by the United States, from appropriations by the State, and from the receipts on account of student fees and departmental sales.

It should be noted that the amount given for each cost element represents the disbursement for the cost element during the biennium. As the amount of the accounts payable at any given time is very small, the disbursements may be regarded as representing practically the entire cost of each element.

Most of the thirty-two cost headings given in the following schedule are self-explanatory. The term "Stipendia" is used to include payments on account of Fellows and Scholars. The item "Laboratory and Departmental Supplies" covers expendable supplies and does not cover laboratory apparatus or equipment. The item "Equipment" is used to cover furniture, fixtures, and apparatus, and includes also the purchase of live stock and farm machinery for the use of the College of Agriculture. The term "Services of Audit Company" refers to the fees of public auditors employed by the Finance Committee of the Board of Trustees to audit the books of the Business Office of the University. The item "Premiums on Bonds and Insurance Policies" covers the expense of the bond of the Chief Clerk in the Business Office, of the Cashier of the College of Medicine, and of the insurance policies required of the University by the United States Department of War on account of the loan to the University of rifles and other munitions of war for military training.

PART SEVEN

BOARD APPROPRIATIONS FOR THE BIENNIUM

The resources available to the Board of Trustees for the support of the University during the biennium were derived from three principal sources:—

1. Receipts on account of student fees and departmental sales
2. State appropriations
3. United States appropriations

The receipts from student fees and departmental sales were available for any purpose that the Board of Trustees might choose to use them. Each item from State appropriations was available only for the particular purpose set out in the appropriation act of the legislature. The receipts from the United States appropriations likewise were available only for the purpose indicated in the several acts of Congress under which the appropriations came into the hands of the Board of Trustees.

From the resources at its disposal, the Board of Trustees made allotments at the beginning of each financial year for each of the several interests in the University. The annual budget made up from these allotments was increased from time to time by additional allotments as new interests demanded, or as the increased demands of the established interests made increases in their allotments necessary.

The appropriations thus passed by the Board of Trustees were assigned by the Comptroller to the particular United States grant or State appropriation to which they could be charged under law, or to the available receipts from student fees or departmental sales. An appropriation account was opened up in the Business Office for each such Board allotment. In the following schedules, the Board appropriations charged against current funds, against State funds, and against United States funds are shown for each year, together with the total disbursements from each Board allotment and the balance in each at the close of each fiscal year. The disbursements under each Board allotment have been analysed in the Business Office and classified under the cost elements shown in the "Analysis of Disbursements by Cost Elements" on page 66 of this report. In the following schedules the extensive cost classification has been condensed so as to show the disbursements under each Board allotment for capital purposes and the disbursements under each Board allotment for operation and maintenance expenses.

P A R T E I G H T

**UNENCUMBERED BALANCES IN BOARD APPROPRIATIONS AS
AT JUNE 30, 1913**

As has been previously explained in connection with the statements of Board allotments for the biennium, an account is maintained in the Business Office with each allotment passed by the Board of Trustees. Up to March 1, 1913, these accounts showed only the cash transactions under each Board allotment; that is, each account showed the amount of the Board allotment, the disbursements under the allotment, and the cash balance. Commencing with March 1, 1913, accounts were opened in the Business Office so as to show the encumbrances outstanding against the cash balance of each Board allotment. These encumbrances are classified under the following five heads:—

1. Salaries assigned against the allotment to the end of the fiscal year
2. Open market orders outstanding (exclusive of Library orders outstanding)
3. Library orders outstanding
4. Repair orders outstanding
5. Contracts outstanding

Commencing with March, 1913, a monthly report has been presented showing the cash balance in each Board allotment, the encumbrances in each allotment, and the free or unencumbered balance in, or overdraft against, each Board allotment.

The following schedules show the monthly report for June, 1913, and are here inserted both to show the status of Board allotments as at the close of the biennium and to show also the method of budgetary control in operation at the University.

PART NINE

GENERAL BALANCE SHEET

The General Balance Sheet of the University as at June 30, 1913, shows assets to the value of \$4,127,239.80. The largest item is Buildings and Permanent Fixtures, \$2,022,175. Each of the items in the balance sheet is shown in further detail in the schedules following, excepting the items notes receivable, accounts receivable, and accounts payable. The notes receivable of the University amounted to \$24,562.42, as at June 30, 1913, and represent loans made to students from the various student loan funds. These notes are shown at their face value.

It will be noted that the accounts receivable are shown as \$11,814.14, and the accounts payable at \$6,205.49. These items are small in amount, because of the policy of the University in collecting all accounts due to it as promptly as possible, and in paying all bills as soon as they are found to be correct. An especial effort is made during the last month of each fiscal year to pay all bills outstanding. In this connection it should be emphasized that an account is shown as paid on the books of the Business Office when a warrant has been regularly issued for its payment. The amount of outstanding warrants in the hands of payees, by comparison with the books of the University Treasurer, was found to be \$147,567.09 as at June 30, 1913. Special attention is called to this fact, because it is the custom in some institutions to refer to such outstanding warrants as accounts payable.

Other than the accounts payable, the University has but one liability, that for equipment loaned by the United States government. This equipment comprises rifles and other military supplies loaned by the national government for purposes of military training.

Surplus

The net worth of the University is shown in five different items. The principal item is that of surplus invested in fixed assets, \$3,687,976.45. This amount represents the estimated value of the land, buildings, and equipments of the University after due allowance has been made for depreciation. In comparing this item with the surplus shown in the financial reports of other institutions, it should be carefully noted that many institutions make no allowance for depreciation in fixing the value of their plant.

The surplus available for capital additions, \$142,551.98, and the surplus available for operation and maintenance expenses, \$142,089.90, represent cash and accounts receivable available, as at June 30, 1913, for the purposes indicated.

The item "reserve for stores" is an offset to the asset item, "expendable supplies," so that the amount indicated as available surplus may represent only cash and accounts receivable.

The total amount of the cash and accounts receivable held by the University in trust for the loan funds is shown as a separate surplus reserve item because the assets belonging to the trust funds are available only for the purpose of these funds.

LAND

In the following pages, the land owned by the University is listed in the date of its accession. The legal description of each piece of property is given, together with the approximate number of acres that it contains. As far as practicable, each piece of land is listed at its cost price. Where the land was donated to the University, as in the case of the land donated by Champaign County in 1867, the price given is the cost price mentioned in the deed of each tract. Except the land donated by Champaign County in 1867, all of the land owned by the University at Urbana-Champaign has been acquired by purchase. The various tracts of land owned by the University outside of Champaign County have, for the most part, been donated to the University for the purpose of agricultural experimentation. Where land has been donated to the University, the amount shown for each tract represents the cost price mentioned in the deed. In a few cases no value is given for the reason that no price is mentioned in the deed to the University.

It should be carefully noted that the value of land as given represents either (1) the cost of the land to the University, or (2) the cost of the land to those who donated the land to the University, excepting in the few cases where no value is given. No attempt has been made to show the value of the land at the present time. In so far as the land in Champaign County is concerned, and especially the land comprising the University Campus, a valuation would be an exceedingly difficult task, for the reason that adjoining land values have been more largely influenced by the fact that the land adjoins the University Campus, or the University Farm, than by any other cause. Under these circumstances it has been thought best to show the cost price of the land rather than to attempt any valuation based upon adjoining land values. In the case of land located outside of Champaign County, each tract of land has been acquired by the University as a permanent experimental field, and likewise it has been thought best to show the value of the land at its last cost price.

It will be seen that the land values shown are extremely low in comparison with the values commonly given to adjoining tracts of land. Especial attention is directed to this point for the reason that land values are sometimes given in the reports of other Universities at an estimated amount based upon comparison with adjoining land values, rather than at cost prices.

	Pavements and Walks		44,500.00
	<i>Total of land and land improvements, page 83.....</i>		\$322,447.00

*Acquired with Chicago College of Pharmacy.

INVENTORIES OF UNIVERSITY PROPERTY AS AT JUNE 30, 1913

In the following schedules, an attempt has been made to show the value of University property, other than land, at the close of the biennium. A complete inventory was taken of all University property, an inventory of the equipment of each department being submitted by the head of the department. A complete inventory was taken of all furniture, physical plant equipment, and buildings by the office of the Supervising Architect. Especial care was taken to eliminate all duplication between the inventories submitted by heads of departments and the inventories submitted by the Supervising Architect.

Method of Valuation.

The method used in arriving at the value of all University property, except land, was, first, to ascertain the original cost of each item of property, or the making of a careful estimate as to the original cost in those cases where the original cost could not be ascertained. Secondly, the number of years that the property had been owned by the University was ascertained, or a careful estimate was made of the number of years that the property was owned in those cases in which the number of years could not be ascertained. Thirdly, uniform depreciation rates were applied to each item of each class of University property. The Business Office is indebted to Professor James M. White, Supervising Architect, for the schedule of depreciation rates used in the valuation of buildings, furniture, and physical plant. The original cost of each item of property, or the estimated original cost of each item of property, was scaled down to a valuation as at June 30th, 1913, according to the number of years that the property had been owned by the University. This work was carefully done in the case of each item of property, and the items so obtained will be used as the basis of a perpetual inventory in the Business Office.

The following depreciation rates were used:

Buildings:

	3	% per annum
President's House	3	%
Horse Barn	3	%"
Horticulture Building	5	%"
Agronomy Green House	5	%"
Dairy Barn	3	%"
Chemistry Building	3	%"
All others.....	2	%"

Furniture:

Stools	10	%"	"
Chairs	10	%"	"
Cheap tables.....	10	%"	"
All other.....	5	%"	"

Departmental machinery and laboratory

equipments.....	5	%"	"
-----------------	---	----	---

Office equipment.....	10	%"	"
-----------------------	----	----	---

Physical plant:

Fire apparatus:

Pumps, reservoirs, gongs, extinguishers....	5	%"	"
Pails and buckets	10	%"	"
Hose	33 1-3	%"	"
Fire tubes.....	50	%"	"

Telephone system:

Cable	7	%"	"
All other equipment	10	%"	"

Steam department:

Conduit wires and cables	7	%"	"
Transformers	7	%"	"
Pipe	7	%"	"
Boilers, stokers, pumps, etc.....	5	%"	"
Wells and piping.....	2 1-2	%"	"
Hydrants and meters.....	5	%"	"
Water mains.....	2 1-2	%"	"

Valuation of Library

The valuation given for the University Library was taken from the records maintained in the Library. In computing this valuation, gifts were excluded, and a depreciation rate of three per cent per annum was applied on the cost of books purchased. The total number of catalogued books and pamphlets in the Library on June 30, 1913, was 238,301.

Valuation of Museums

A complete inventory was taken of the museums of the University, in so far as the items in the museums have been cataloged. No attempt was made to value the museums, since, in the first place, a great part of the material in the University museums has been acquired by gift, or incidental to investigations, and in the second place, the material in the museums does not have a commercial value, altho the material is, of course, very valuable to the University for the purposes of scientific investigation and research.
